The university organizes refresher, orientation and workshops for teachers on the syllabus. BOS and BOE members prepare the curriculum. The teaching has been made digitalized. ## 2.3 - Teaching- Learning Process

2.3.1 - Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

The college practices a teaching methodology that focuses on imparting education through a student-centric approach. This methodology helps to transform students from being relegated to the role of passive recipients to active and involved stakeholders, apart from boosting their confidence it also encourages self-reliance. Since students vary in their ability to comprehend and absorb, it is not possible to address the needs and expectations of individual students and expect a uniform learning outcome from them all in a teacher-centric class. The teacher facilitates learning by allowing each individual student to comprehend at their personal level by ensuring their involvement in class activities so that they can absorb and grasp information at their own pace. Our college believes in the adoption of students centric methods to enhance student involvement as a part of participative learning and problem-solving methodology. Role Plays, Team works, Debates, Seminar, Quizzes and Case Studies. Specifically, Students' centric Teaching Methods are reflected in project work, Field Visits, Industrial visits & guest lectures. Specifically, the students' centric methodology is included.

Teachers prepare modules on important topics which are produced and recorded by the Instructional Media Centre and made available for students online. The use of ICT by teachers in classrooms apart from enabling

students to keep pace with the contemporary digital and virtual world has helped to create a student-centric learning approach. There are 4 ICT-enabled classrooms in our college. wi-fi connected campus helps the teachers in developing e-content in different subjects. Our library also offers a wide range of e-resources to students and faculty members. Our faculty members formed WhatsApp groups of the students to deliver their content to the students. Students clarified their doubts by using various internet-based options. Online essay competitions and workshops were also conducted.

**2.5 - Evaluation Process and Reforms**

2.5.1 - Mechanism of internal assessment is transparent and robust in terms of frequency and mode. Write description within 200 words.

In our college, there is a standard process of internal examination. As per CBCS and Non-CBCS internal assessment is done with 20 marks and NEP with 40 marks. According to the academic calendar, a student has to appear in 2-internal examinations. In order to ensure transparency in internal assessment, the system is communicated to the students well in time. Personal guidance is given to poor performers. The Students are asked to deliver seminars on the concerned subjects. Topics are given by their teachers to the students to prepare for PowerPoint presentation and chalk & talk method. This method removes fear in a student and develops self-confidence in him/her. The method of internal assessment helps the teachers to evaluate the students more appropriately. Due to internal assessment, the interest of the student in learning and attending the classes has also increased. It has created interest among the students to take active participation in various co-curricular and extra-curricular activities for their overall personality development. The seminar presentation improves the communication skills of the students which is very essential to face the interviews. In this way, the mechanism of internal assessment is transparent and robust.

2.5.2 - Mechanism to deal with internal examination related grievances is transparent, time- bound and efficient

The institution gets the calendar of events prepared by the parent university before the commencement of the academic year through the university website. The institution implements the parent university evaluation reforms strictly. The examination committee manages all duties of the internal and external examination and prepares the timetable for conducting IA Tests. The Principal's meeting with supervisors of the semester examinations is held regularly before the commencement of the examinations. Internal tests and seminars are conducted, and assignments and project work are collected as per the university norms. Recently software called 'Uniclare' has been installed for smooth communication of exam-related information. The results are declared online and the same is informed to the Students. Redressal of Grievances is done at three levels. Department Level: The continuous evaluation of students is carried out by faculty regarding theory classes, lab experiments, assignments, and internal tests. College Level: The

institute appoints a senior faculty member as the convener of the examination committee for the smooth conduction of the examination. University Level: Students are allowed to apply for revaluation, recounting and challenging evaluation by paying necessary processing fees to the university if they are not satisfied with the university evaluation.

## 2.6 - Student Performance and Learning Outcomes

2.6.1 - Teachers and students are aware of the stated Programme and course outcomes of the Programmes offered by the institution.

Programme Outcomes, Programme Specific Outcomes, and Course Outcomes: Our College adopts outcome-based education. The following methods are followed to make teachers and students aware of the stated programmes and course outcomes. They are communicated to all the students especially first-year students at the commencement of the programme specified by the university. Soft copies of the curricular and learning outcomes of programmes and courses are uploaded on the Institution and university website for reference. Learning outcomes of the programmes and courses are observed periodically by the students and teachers. The importance of learning outcomes of the programmes is communicated to teachers in every staff meeting. Students are also communicated about them at the time of Fresher's Day and the Inaugural function of the college union. Teachers explain these to the students in detail at the commencement of each programme. The Science faculty members communicate to the students about the proper use of laboratory equipment correctly and effectively, so that they can learn how to conduct measurements, analyze and interpret the results. Teachers conduct brainstorming sessions to define all these outcomes. They organize and attend works shops, seminars, conferences, refresher courses etc, which can throw more light on POs and Cos.

2.6.2 - Attainment of Programme outcomes and course outcomes are evaluated by the institution.

The following methods are carried out by our institution to evaluate the attainment of POs and Cos. These methods are classified into two types: Direct methods and Indirect methods. Direct methods: These methods display the student's knowledge and skills from their performance in the class tests, internal tests, assignments, semester examinations, workshops, seminars, group discussions, laboratory experiments, mini-projects, etc. These can make students refer to the text and reference books to find out the answers and understand the expected outcomes of the given program. Two internal tests are conducted per semester in CBCS, Non-CBCS and NEP systems specified by the university. Indirect Method: To ensure the students' attainment of POs and COs, collection of feedback on curriculum by students, employers, alumni and teachers is conducted for finding out whether the knowledge, skill and attitude learned from the institution is adequately satisfying their expectations or not. A student satisfaction survey is also conducted every year to identify several factors for future strategy framing once in a year. It also helps the institution to understand the strength and weaknesses of various programs imparted. Miss Ambika Ghantimath in the sixth semester and Miss Afreenkousar Mulla in the fifth semester scored 100 marks in physics in 2021-22.

**2.3 - Teaching- Learning Process**

2.3.1 - Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

The college practices a teaching methodology that focuses on imparting education through a student-centric approach. This methodology helps to transform students from being relegated to the role of passive recipients to active and involved stakeholders, apart from boosting their confidence it also encourages self-reliance. Since students vary in their ability to comprehend and absorb, it is not possible to address the needs and expectations of individual students and expect a uniform learning outcome from them all in a teacher-centric class. The teacher facilitates learning by allowing each individual student to comprehend at their personal level by ensuring their involvement in class activities so that they can absorb and grasp information at their own pace. Our college believes in the adoption of students centric methods to enhance student involvement as a part of participative learning and problem-solving methodology. Role Plays, Team works, Debates, Seminar, Quizzes and Case Studies. Specifically, Students' centric Teaching Methods are reflected in project work, Field Visits, Industrial visits & guest lectures. ## 2.5 - Evaluation Process and Reforms

2.5.1 - Mechanism of internal assessment is transparent and robust in terms of frequency and mode. Write description within 200 words.

In our college, there is a standard process of internal examination. As per CBCS and Non-CBCS internal assessment is done with 20 marks and NEP with 40 marks. According to the academic calendar, a student has to appear in 2-internal examinations. In order to ensure transparency in internal assessment, the system is communicated to the students well in time. Personal guidance is given to poor performers. The Students are asked to deliver seminars on the concerned subjects. Topics are given by their teachers to the students to prepare for PowerPoint presentation and chalk & talk method. This method removes fear in a student and develops self-confidence in him/her. The method of internal assessment helps the teachers to evaluate the students more appropriately. Due to internal assessment, the interest of the student in learning and attending the classes has also increased. It has created interest among the students to take active participation in various co-curricular and extra-curricular activities for their overall personality development. The seminar presentation improves the communication skills of the students which is very essential to face the interviews. In this way, the mechanism of internal assessment is transparent and robust.

2.6.2 - Attainment of Programme outcomes and course outcomes are evaluated by the institution.

The following methods are carried out by our institution to evaluate the attainment of POs and Cos. These methods are classified into two types: Direct methods and Indirect methods. Direct methods: These methods display the student's knowledge and skills from their performance in the class tests, internal tests, assignments, semester examinations, workshops, seminars, group discussions, laboratory experiments, mini-projects, etc. These can make students refer to the text and reference books to find out the answers and understand the expected outcomes of the given program. Two internal tests are conducted per semester in CBCS, Non-CBCS and NEP systems specified by the university. Indirect Method: To ensure the students' attainment of POs and COs, collection of feedback on curriculum by students, employers, alumni and teachers is conducted for finding out whether the knowledge, skill and attitude learned from the institution is adequately satisfying their expectations or not. A student satisfaction survey is also conducted every year to identify several factors for future strategy framing once in a year. It also helps the institution to understand the strength and weaknesses of various programs imparted. Miss Ambika Ghantimath in the sixth semester and Miss Afreenkousar Mulla in the fifth semester scored 100 marks in physics in 2021-22.

6.5.2 - The institution reviews its teaching learning process, structures & methodologies of operations and learning outcomes at periodic intervals through IQAC set up as per norms and recorded the incremental improvement in various activities

The IQAC of the college has devised several mechanisms to review the effectiveness of the teaching-learning process, structures and methodologies of operations in the institution and strived hard for its reforms. Adequate space in classrooms, appropriate knowledge resources in the library and ICT facilities, labs and the library are ensured before the

commencement of every academic year. A good number of teachers' participation in framing of syllabi at the UG level and the faculty participation in syllabus revision workshops enhance the preparedness for effective teaching-learning in the classrooms. Discussion of the syllabus, examination pattern and the PSOs and COs in the classrooms at the beginning of the academic session helps to create a clear perspective regarding the curriculum. As a prerequisite of effective teaching-learning, the students are classified as slow and advanced ones by applying various criteria and a variety of teaching methods are used accordingly. The most commonly used methods are projects, internships, field visits and ICT-based teaching. For further enhancement, many departments prepare specialized tools such as workbooks, practical handbooks, blogs, etc. Guest lectures by eminent faculty from institutes with MOU are also arranged for providing exposure to the frontiers of knowledge.
